CURRICULUM VITAE

GIANCARLO DIMAGGIO

TRAINING AND WORK

M.D., Psychiatrist, Psychotherapist.

I have completed a training in cognitive/constructivist psychotherapy, and one in psychoanalytic psychodrama, plus years of learning processes (lessons and supervisions) in group-analytic oriented group and family therapies.

I am having a personal therapy with a psychoanalyst of relational orientation

1995-1999 - Head of a rehabilitation centre for psychiatric problems comorbid with mental retardation

1996- 2011 Founding Member of the *Terzo Centro di Psicoterapia Cognitiva*, Rome

1998- 2011 Trainer of the schools for cognitive psychotherapy *Associazione di Psicologia Cognitiva* and *Scuola di Psicoterapia Cognitiva*, Rome

2001- Present Trainer of the *Società Italiana di Terapia Comportamentale e Cognitiva*

2004 and 2006 – Lecturer at the University of Lecce, Italy, Doctoral Program in Clinical Psychology

2007 – Lecturer at the University Raimond Llull in Barcelona, Doctoral Program in Clinical Psychology

2007 – Teacher at the Master in Research Methodology organized by the Society for Psychotherapy Research - Berne

2007 – Present Member of the Scientific Committee for the Master in Research Methodology organized by the Italian Chapter of the Society for Psychotherapy Research

2008 – Lecturer at the Gent University, Belgium, Doctoral Program in Clinical Psychology

2009 – Lecturer at the Roskilde University, Department of Psychiatry

2009 – Teacher at the Research Summerschool, Gent University

2009 Trainer of the school for cognitive psychotherapy *Istituto A.T. Beck*, Rome

2010 – Lecturer at the University of Rome, Italy, Training school in Clinical Psychology

2010 – Lecturer at Copenhagen University.

2010 – Professor of Psychotherapy of Personality Disorders – II Scuola di Specializzazione in Psicologia Clinica – University “La Sapienza” – Rome.

2012 – Founding member of the *Centro di Terapia Metacognitiva Interpersonale*

2012 - Trainer of the school *Studi Cognitivi* - Milan.

Editorial Board Membership

2004 – Present Editorial Board *Journal of Constructivist Psychology*

2005 – Present Associate Editor *International Journal for Dialogical Science*

2007 – Present Editorial Board *Cognitivismo Clinico*

2009 - Present Editorial Board *Psychotherapy Research*

2009 - Present Editorial Board *Journal of Personality Disorders*

2009 - Present Associate Editor *Research in Psychotherapy: Psychopathology, Process and Outcome*

2010 - Present Editorial Board *Frontiers in Psychopathology*

2011 - Present Associate Editor *Psychology and Psychotherapy: Theory, Research and Practice*

I currently work in private practice, mainly with patients suffering from personality disorders, adopting Metacognitive Interpersonal Therapy (cfr. Books, ref. 2,3). The approach combines individual, group, and family therapies, plus pharmacotherapy. I'm a psychotherapy trainer and supervisor.

RESEARCH INTERESTS AND PROJECTS

My main research interests lies in the fields of: 1) personality disorders: assessment, psychotherapeutic change; treatment effectiveness; classification; 2) self-narratives; 3) models of the self; 4) metacognition in severe adult disorders.

Since 1996, at the Terzo Centro di Psicoterapia Cognitiva, in Rome, I've started studying the life narratives and the states of mind as they appear in the transcripts of audiotaped session of outpatients. Focuses of this area of single case research are: tracking states of mind and the level of metacognitive skills and studying how they change during psychotherapy.

The underlying assumptions are that: a) specific states of mind can be tracked in each patient; their change is a good index of global psychotherapeutic change; b) severe patients have problems in reflecting upon states of mind, both their own's and others', that is to say they have poor metacognitive skills.

I've tried to apply this concept to the field of personality disorders, exploring, both theoretically and empirically, the ideas that: a) different personality disorder patients show sets of states of mind typical of the diagnosis and b) that impaired metacognition is a core feature of personality pathology.

Moreover I've investigated how in severe patients the ability to narrate life history his impaired in two directions: some self-narratives are disorganised, other ones are impoverished. I've tried to describe, via transcript analysis, how psychotherapy might deal with these problems.

This research field is continuing and, with the colleagues of the Terzo Centro, I'm accumulating single case evidence about states of minds, narratives and metacognitive skills of patients with different PD diagnosis.

From 2000 to 2003 I've received a grant from the University of Nijmegen, supported by Hubert Hermans, to explore dialogical self theory and apply its basic tenets to the analysis of session transcripts and patients diaries. I'm continuing to explore this field, in particular trying to understand what kind of pattern of internal and interpersonal dialogue can be found in patients with different personality disorders, how therapists enter in this dialogues and how they work to help patients create new and healthier form of relating.

In the field of personality disorders I've tried to develop a model of self-pathology underlying personality pathology that includes the empirical observations emerging from my group's research, together with empirical evidence arising from different fields: personality psychology, neurosciences, psychotherapy research, cognitive science, narrative analysis.

This research program has led to the construction of the therapy approach named Metacognitive Interpersonal Therapy (MIT), aimed at treating patients with personality disorders.

Among PDs I've focused on the study of pathology and therapy of Narcissism.

Currently my research projects involves cooperation with different sites, both in Italy, EU and USA focused on understanding pathology of personality disorders, in particular how metacognitive problems are related to poor social functioning and treatment response and how traits such as narcissism or perfectionism might have relationship with other aspects of personality pathology.

I'm developing models of therapeutic process suitable for task analysis tailored to specific personality disordered traits, such as inhibitidness or dysregulation. I'm cooperating with other research to investigate neuroimage correlates of narcissism and other personality variables.

Together with Paul Lysaker in Indianapolis and Andrew Gumley in Glasgow I'm cooperating on an ongoing project investigating the role of metacognitive deficits in schizophrenia and personality disorders.

In 2012 I've founded the Center for Metacognitive Interpersonal Therapy, specialized in treatment for Personality Disorders and severe adult mental disorders. Research will focus on correlates of pathology of personality disorders, especially as regard metacognitive dysfunctions and interpersonal processes, and on advancing the model of Metacognitive Interpersonal Therapy. A pilot non-randomized trial is planned in late 2012.
